IJTDirect Printer Test & Calibration Page: Print this on A4 80GSM white paper, full size and normal print settings. Compare the print to the on screen version. If there is a noticeable difference in quality, check to see if your inks/toners need changing. Run a Cleaning/Maintenance cycle on the printer, re-print and compare again. If you are still having troubles send us a scan or clear photo of the printed test page and a printer status page send to support@ijtdirect.co.uk
